Official report on Evacuations during Halyard mission

[redacted]

Summary of Halyard Evacuations, 30 December 44, cont'd page 1.

evacuations. A large number of the evacuees were injured, several seriously. The men had to be moved from place to place in enemy occupied territory in the immediate vicinity of the enemy and in continuous danger of attack.

6. All evacuations were completed without accident except for a dent in the left wing tip of a C-47, which hit the top of a hay stack when landing at the extremely marginal strip at Kocevljevo.

7. The summary of evacuations is as follows:

NOTE: Comparing to data in our research, there are minor differences. For First evacuation on August 10, we have 226 names (instead of 225). For Second and Third evacuation, there are 17 and 40 names (instead of 15 and 43). Other dates and totals were complete match.

NOTE ON CRASH AREA: All places were given as reported by crew, they usually represent nearest larger city.

NOTE ON SOURCES: All data given are based on combination of MACRs and Escape statements. Due to small percentage of missing documents, in some cases date of rescue is not correct.
